ELECTRICAL ENGINEERING IN JAPAN

VOLUME 104

CONTENTS FOR 1984

Number 1

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

The Surface Energy of the Metal and the Characteristics of the Contact in Insulating Oil, by Norio Tahara, Yasuo Nagano and Masayuki Ieda 1

An Estimation of Breakdown Voltage of High-Voltage Motor Insulation by RC Value, by Shohachiro Itoh, Tsutomu Tani, Hiroshi Koshiba, Takeshi Kawakami and Masayuki Ieda 7

Treeing Breakdown Phenomena Associated with the Space Charge Formation in Ethylene Vinyl Acetate Copolymers, by Hideaki Kawamura, Masahito Nawata and Masayuki Ieda 16

Gassing Characteristics of Transformer Oil, by Yasuhiko Kako and Yuzuru Kamata . 24

Finite Element Analysis of Magnetic Field of Cylindrical Solenoid with Open Boundaries, by Masayuki Hattori and Kazutoshi Asano 33

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Development of Totally Metal Enclosed SF_6 Gas Insulated HVDC Converter Station, by Kiyoji Morii, Susumu Matsumura, Yoshinobu Harumoto, Eiji Kawagoe, Syotaro Tominaga, Hiroshi Kuwahara, Masao Yano and Yoshihiko Yamamoto 40

Simulation of Steady State Characteristics and Loss of Synchronism Phenomena of a Synchronous Machine Taking into Account Magnetic Saturation Effect, by Junya Matsuki, Toshishige Nagao, Takao Okada and Chikasa Uenosono 50

A Method of Drawing the Vector Loci Phase Voltages during Single Line-to-Ground Fault in Unbalanced Three-Phase Circuit, by Takashiro Iwaya 58

Dielectric Strength of Transformer Insulation Against Oscillatory Impulse Voltages, by Tsuneharu Teranishi, Toshiyuki Yanari, Masaki Honda and Tamotsu Inoue . . . 66

Circulating Current Control Based on the Decoupling Control Theory, by Susumu Tadakuma, Shigeru Tanaka, Yoshiaki Tamura and Haruo Naito 74

An Improvement of Input Current Waveforms of Three-Phase Diode Bridge Using Bidirectional Switches, by Ichiro Sasaki and Yoshifumi Amemiya 82

Planning of Bulk Power Systems Interconnected by HVDC Link, by Michinobu Kono, Yuji Kobayashi and Eiichi Tsukada 91

A Proposal of Power System Interconnection Scheme as Viewed from Reserve Capacity Interchange, by Michinobu Kono, Yuji Kobayashi and Eiichi Tsukada 100

Eddy Current Analysis of Induction Heating by Boundary Element Method, by Kazuhisa Ishibashi 109

Reliability Analysis of Ultra-High Voltage DC Transmission System by Event Tree Analysis, by Yasuo Ohba, Toshiyuki Hayashi, Yukio Yoshida and Kazuhiro Takahashi 118

Page

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Network Model of Failure Propagation Process in a Plant, by Satoshi Miyazaki, Masasumi Kokawa and Sadanori Shingai 129
An Optimization Method for Investment in a Project Represented by GERT Network, by Kenzo Kurihara, Susumu Seki and Kichizo Akashi 135

Number 2

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Studies of Creeping Discharge on the Surfaces of Electrolytic Aqueous Solution by Schlieren Method, by Yoshitaka Nakao, Katsunori Miyagi and Taikichi Hattori 1
Relation between AC Flashover Voltage and Voltage Build-up Rate on Rectangular Polluted Surfaces, by Masashi Sato, Akio Kaga and Hideo Akagami 11
Study of Electrical Breakdown of Polymer Film by Partial Discharge in Liquid Dielectrics, by Yukio Mizuno, Kenji Tsuge, Noriyuki Shimizu and Kenji Horii 19
Analysis and Evaluation of Thermal Stability of Insulated Coils, by Takeshi Hakamada and Shigeo Amagi 26
Three Regional Classification Method of Fundamental Characteristics of Ceramic Transformer and Distorted Wave Driving, by Toshihiko Wada, Nobumi Hagiwara and Takeo Saegusa 33

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Optimal Dispatching of Reactive Power in Power System Planning and Operation, by Shigeru Tamura, Shin-ichi Iwamoto and Yasuo Tamura 45
Analysis of an AC Excited Synchronous Machine Analysis of the V-Characteristics, by Junji Tamura, Jun Hasegawa and Hajime Fujiwara 54
A Modulation Technique of PWM Inverter Using Phase-Locked Loops, by Keiju Matsui and Noriaki Sato 61
Thyristor Phase Modifier of Compound PWM Scheme, by Hiroshi Kazuno 72
Analysis of Dynamic Characteristics of Stepping Motor System in Consideration of Elasticity of Rotating Shaft, by Hiroyuki Kojima and Shinji Ikeda 82
Steady-State Analysis of New Cycloconverter with High-Frequency Tank Circuit for Induction Heating, by Hisayuki Kojima, Youngseek Kim, Shigeru Okuma and Koji Iwata . . 87
Characteristics and Carter's Coefficient of Small Induction Motors with Ferrite Magnetic Wedges, by Yoshihisa Anazawa, Akio Kaga and Hideo Akagami 94
Analysis of Magnetic Circuit and Starting Characteristics of Flat-Type Linear Pulse Motor with Permanent Magnets, by Yukio Yamamoto and Hajime Yamada 102
Performance of Brushless Salient-Pole Self-Excited Three-Phase Synchronous Motor Driven by Transistor Inverter, by Sakutaro Nonaka, Kunii Fujii and Takemi Kawaguchi 111

Page

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

A Method of Plant Data Summarization Based on Cause-Consequence Relation Disturbance Model, by Makoto Tsukiyama 119
Identification of a System with Dead Time and Its Application to Auto Tuner, by Yasuo Tachibana 128

Number 3

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Dielectric Properties and Thermally Stimulated Currents of Slightly Plasticized Polyvinylchloride Films, by Yoshinori Ohta and Masayuki Ieda 1
Breakdown Characteristics of High-Temperature Air, by Masayoshi Nagata, Iwao Miyachi, and Yoshihide Yokoi 10
Analytical Considerations on Nanosecond Surface Discharges (Negative Polarity), by Kunihiko Hidaka and Yoshihiro Murooka 19

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Parallel Running of GTO PWM Inverters, by F. Tsuchiya, S. Okuma, and K. Iwata 30
Improvement of Power System Stability by Means of Static Var Compensator, by Masayuki Nanba, Yasuji Sagisaka, Yuichi Mizukami, Hirotaka Yoshida, Kaneyoshi Murotani, Masakuni Asano, and Yoshiya Ogihara 40
Fast Transient Stability Analysis Suited for an Array Processor, by Hisao Taoka and Shigeru Abe 49
Switching Transient Phenomena of Schrage Motor, by Masahiko Kamatani and Iwao Shibata 60
Analysis of Characteristics of a Synchronous Inductor Motor, by Akira Tozune 68
Nonlinear Analysis of Sudden Three-Phase Short-Circuit of a Synchronous Generator, by Yoshiaki Inoue, Yoshisuke Ueda, and Chikasa Uenosono 75
Analysis and Test of Asynchronized-Synchronous Operation of Dual Excited Generator in Power System, by Kohichi Nakamura and Takashi Aihara 84
An Approach to the Torque-Speed Regulation of the Separately Excited DC Motor Using a State Observer, by Kiyoshi Oishi, Kouhei Onishi, and Kunio Miyachi 93
A Discrete Time Feedback Control of a Thyristor Reactive Power Compensator, by Yoshiki Matsuo and Michio Nakano 100
A Method of Calculating the Characteristics of Squirrel Cage Type Induction Motor Driven by a Nonsinusoidal Voltage Source, by Tadao Fujimaki and Osamu Miyashita . . 108
Abnormal Starting Torque Characteristics of a Capacitor Motor, by Kazuo Tsuboi, Yuji Akiyama, and Shichiro Ikeda 117

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Identification of Nonlinear Systems by Bayesian Theorem, by Tsuyoshi Okita, Shogo Tanaka, and Hiroaki Yoshida 126
Identification of Load Characteristics of Power Systems Using GMDH, by Setsuo Sagara, Junichi Murata, and Kanichi Kishimoto 134

Number 4

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Propagation Characteristics of Electromagnetic Waves Guided by an Inhomogeneous Plasma Slab., by Shoji Yamaguchi and Toshio Hosono 1
Comparison of Constant Stress and Constant Cycle Tests for Thermal Evaluation of Insulation Systems, by Takeshi Hakamada 9
Experimental Studies on the Discharge Types, Discharge Characteristics, and Discharge Regions of Negative Point-to-Plane Gap in N_2-O_2 Mixture, by Yoshihisa Sekiya, Tatsuzo Hosokawa, and Yasunori Miyoshi 18
A Numerical Model of Wall-Stabilized Arc Sustained in the Forced Axial Air Flow, by Toshiro Matsumura and Yukio Kito 28
Time Characteristics of the Resorption Current and the Open-Circuit Voltage on Plasticized Polyvinylchloride Containing Absorbed Water, by Mitsuyoshi Onoda, Hiroshi Nakayama, and Kiyoshi Amakawa 34
Bidirectional Pulsers with High Efficiency for Linear Induction Accelerators, by Eiki Hotta and Masayoshi Abe 41
Three-Dimensional Simulation of Tilting Instability of Spheromak, by Kozo Katayama, Hiroyuki Osaki, and Makoto Katsurai 54

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Geometry Optimization of Electrode by Boundary Element Method, by Shinji Tokumasu, Hidekazu Murakawa, and Teruki Myojin 62
Specific Duties and Economic Evaluation of Energy Storage Systems in Electric Power Systems, by Junichi Toyoda 68
Numerical Analysis of Nonlinear Transient Magnetic Field Using the Finite Element Method, by Takayoshi Nakata and Yoshihiro Kawase 81
Voltage Type Control of Induction Motor by Means of Field Acceleration Method, by Sakae Yamamura, Satoko Nakagawa, and Atsuo Kawamura 89
Transient Analysis of Disk-Type Open Cycle MHD Generator, by Nobuhiko Hayanose, Takehisa Hara, and Juro Umoto 95
A Fast Stabilization Method and Its Algorithm Based on the Observation of Generator Dynamics, by Masahiro Sato, Ryoichi Tsukui, and Kazuya Omata 103
On-Line Identification of Potential Energy at the Unstable Equilibrium Point and Its Application to Adaptive Emergency Control of Power System, by Shgo Nishida 113
A Study on the Reduction of Harmonic Rotor Copper Losses of Three-Phase Squirrel Cage Induction Motor Driven by Inverter, by Kiminori Hasuike 124

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

Continuous and Sampled Data Feedback Type Precision Current Amplifier for Testing Watt and Watthour Meters, by Kunihiko Takahashi. 130

Number 5

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

Surface Flashover Characteristics in Nitrogen Gas at Cryogenic Temperature Using Plane to Wavy Formed Electrodes, by Satoshi Matsumoto and Teruya Kouno 1
Consideration of the Measurement of Static Charges in Insulating Oil and the Influence of Oil Conductivity on the Charges, by Masaru Higaki, Yasuyuki Tsutsumi, Hiroyasu Ohtani, and Hideo Tsukioka 9
Accelerated Test for Evaluating the Tracking Resistance of Rubber and Plastic Insulation Wires and Breakdown Phenomenon, by Makoto Nishida, Noboru Yoshimura, Fumitoshi Noto, Eiji Itoga, and Shoji Suga 18
Degradation of Polyethylene by Combination of Irradiation and Thermal Aging, by Shuhei Nakamura, Fumio Murabayashi, Goro Sawa, and Masayuki Ieda 29
Space Charge Effect Associated with Tree-Initiation in Polyethylene under Square Pulse Conditions, by Noboru Yoshimura, Yoji Koike, Fumitoshi Noto, and Shigetaka Fujita . 37
Evaluation of Acceleration Factors in Sequential Stress Aging Tests, by Takeshi Hakamada 48
Formulation of the Problem on Transient Eddy Current Analysis by Boundary Element Method, by Masao Washizu 56

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Influences of Cast Rotor Slot Size on a Slot Constant and Motor Characteristics, by Kazutoshi Iwata 65
Methods for On-Line Transient Stability Assessment of Power System, by Susumu Yamashiro and Toichiro Koike 75
Analysis of Oscillation Modes in Power System Including Induction Motors, by Takafumi Maeda and Toshihiko Komukai 84
An Analytical Problem of Conventional LIM Theories Based on a Sinusoidal Primary Current Sheet Model with Finite Length, by Sakutaro Nonaka and Tatsuya Furukawa 92
Analysis of Separation Mechanism of a Coupled Pole-Type Magnetic Separator, by Takuma En, Tadao Nakano, Yasuki Akimoto, and Joosuke Harada 101
Stabilizing Control of Power System by Using a Lyapunov Function, by Hiroyuki Kaizu and Tsuneo Taniguchi 108
A Modified Newton Method for Optimal Power Flow Using Quadratic Approximate Power Flow, Kenichi Aoki and Masakazu Kanesashi 115

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

A Dynamical Method of Predicting the Percentile Levels for Nonstationary Noise Environmental System, by Mitsuo Ohta, Kazutatsu Hatakeyama, and Kiminobu Nishimura 123
Optimization of an Observation System for a Failure Diagnosis, by Shoto Tanaka and Tsuyoshi Okita 132

Number 6

Page

PART A

Electrical and Electronics Materials, Plasma Physics, Nuclear Fusion, Precision Measurement and Instrumentation, Electromagnetic Theory and Nonlinear Oscillation

A New AC Dielectric Breakdown Test Method of Stator Coils for High-Voltage Rotating Machinery, by Tsutomu Tani, Shohachiro Itoh, and Shoji Hirabayashi 1
Correlation between Energy of Scintillation Discharge and Tracking Resistance of Polyvinylchloride with Added Aluminum Hydroxide or Aluminum Oxide, by Shuhei Nakamura, Hirotoshi Kaneda, Goro Sawa, and Masayuki Ieda 10

PART B

Electric Machinery, Power Apparatus, Energy Conversion, Magnetohydrodynamics, Electric Railway, Power Systems Planning, Power Distribution and Transmission

Application of Meteorological Satellite Data to Rainfall Forecasting in the Upper District of Hydro-Power Generation Dams, by Katsuhiro Ichiyanagi, Toshiro Matsumura, Yukio Kido, Yoshiko Yamada, and Masakatsu Suzuki 19
Verification of Operation Sequence for Substation Switching Equipment, by Keinosuke Matsumoto and Toshiaki Sakaguchi 28
A Cycloconverter with Interphase Reactor Equipped with Secondary Winding, by Takeshi Furuhashi and Yoshifumi Amemiya 34
Evaluation of the Method for Compensating the End Effect by Primary Winding in High Speed LIM, by Sakutaro Nonaka and Nobuo Fujii 43
Theory of Analysis of Torque Control of Synchronous Motor as Control Motor, by Sakae Yamamura, Kaoru Nakamori, and Fumio Kondo 52
Electromagnetic Shielding Effects of the Guard Cable on the Trunk Road, by Kenji Yukihira, Koichi Miyazaki, Yukio Inoue, and Kenzo Tsujimoto 62
An Approach to Induction Motor Drive with Controlled Voltage Source, by Kouhei Onishi, Kunio Miyachi, and Masayuki Terashima 72
Multivariable Optimal Control of Generator Excitation and Speed Governor System, by Kei Otsuka, Yoshiteru Ueki, Chikasa Uenosono, Katsuyoshi Neri, and Sumio Yokokawa . . 79
Stabilization of Power System by Eigenvalue Control — Stabilization of Series Capacitor Compensated Power System, by Kenji Komai, Jisheng Jing, and Yasuji Sekine 88
A New Parallel Processing Method for Load Flow Calculation Using Sensitivity Matrix and Its Comparision with the Diakoptics-Based Method, by Akihiko Yokoyama and Yasuji Sekine 98
Current Source Inverter with Commutation Control by GTO Thyristors, by Sakutaro Nonaka, Yasuhiko Neba, and Ken'ichi Kikuchi 109

PART C

Solid-State Devices, Quantum Electronics, Integrated Circuits, Optoelectronics, Information Processing, Communication Systems, Computer Control, Learning Theory and Pattern Recognition

A Gradient Method Applied to Optimal Control Problems Under Inequality State Variable Constraints, by Hiroo Yamamura, Tadashi Sakaguchi, and Toyomi Ohta 118
Problems on Conversion of Multivariable Discrete-Time Systems into Continuous-Time Systems, Tsutomu Mita and Hiroshi Kaizu 127
